THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

DETAILED ACTION

Acknowledgement

1. Acknowledgement is made of applicant's amendment made on 07/01/2009. Applicant's submission filed has been entered and made of record.

Status of the Claims

2. Claims 1, 4-5, 7, and 9-11 are pending.

Examiner's Amendment

3. An examiner's amendment is applied to all independent claims as follow:

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~striketrough~~. When strikethrough cannot easily be perceived, or when five or fewer characters are deleted, [[double brackets]] are used to show the deletion. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

1. (Currently Amended) An image processing method of generating quantized output data having four-component output of cyan, magenta, yellow and black for an output device from image data having three-component input of cyan, magenta and yellow, the method comprising:

using a processor to perform the steps of:

Art Unit: 2625

inputting image data of a pixel of interest;

generating input data by adding error data, calculated from color difference data of pixels around the pixel of interest, to the image data;

extracting the high-order bit data from each of the three-component input of the generated input data;

deciding the quantized output data of the pixel of interest and output density data of the pixel of interest, by referring to a multidimensional table based upon the extracted high-order bit data, wherein the multidimensional table stores a correspondence between the input data, the quantized output data and the output density data and wherein the output density data has the three-component input of cyan, magenta and yellow, and represents a density of an output image reproduced by the output device based upon the quantized output data; and

calculating the color difference data of the pixel of interest by subtracting the decided output density data from the generated input data,

wherein the quantized output data included in the multidimensional table is decided such that a cyan dot and a magenta dot are not simultaneously output by the output device in an area where a value of the cyan component and a value of the magenta component are low, and is decided so as to minimize the difference between the input data and the output density data in other areas.

Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with applicant's representative of record John D. Magluyan on 9/22/2009.

Response to Applicant's Arguments

4. Claims 1, 4-5, 7, and 9-11 are allowed.

The prior arts of record does not disclose generating input data by adding error data, calculated from color difference data of pixels around the pixel of interest, to the image data;

extracting the high-order bit data from each of the three-component input of the generated input data;

deciding the quantized output data of the pixel of interest and output density data of the pixel of interest, by referring to a multidimensional table based upon the extracted high-order bit data, wherein the multidimensional table stores a correspondence between the input data, the quantized output data and the output density data and wherein the output density data has the three-component input of cyan, magenta and yellow, and represents a density of an output image reproduced by the output device based upon the quantized output data.

In fact, the closest prior art *Bhaskar et al. (US 6002804 A)* discloses extracting the significant digits of input image data to decide an optimal halftoning algorithm by referring to a multidimensional table storing a correspondence between the extracted significant bits and halftoning algorithms.

Further, although *Ikeda Toru (JP 11-055535)* discloses deciding the quantized output data of the pixel of interest by referring to a multidimensional table based upon the extracted high-order bit data, wherein the multidimensional table stores a correspondence between the input data and the quantized output data and the output density data and wherein the output density data has the three-component input of cyan, magenta and yellow, and represents a density of an output image reproduced by the output device based upon the quantized output data (**Drawings 4 and 8**);

calculating the color difference data of the pixel of interest by subtracting the decided output density data from the generated input data (**Drawing 2**),

wherein the quantized output data included in the multidimensional table is decided so as to minimize the difference between the input data and the output density data in other areas (**Paragraph 52-54**).

However, *Ikeda* does not disclose “wherein the quantized output data included in the multidimensional table is decided such that a cyan dot and a magenta dot are not simultaneously output by the output device in an area where a value of the cyan component and a value of the magenta component are low”.

Therefore, the claimed invention as recited is allowable over the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be labeled “comments on statement of reasons for allowance”.
